

Important Trainer Parties: Rebalanced Versions

This document contains full team details for every important Trainer in the game. This includes gym leaders, named Team Flare members, rivals*, the Elite Four, the Champion, and AZ. Trainer teams are listed under headings in the order above, and in the order they appear in the game. Details for any rematch teams in the Battle Chateau are not included, nor are any of the post-game teams.

All Trainers are fought in single battles unless otherwise mentioned, and all Trainers except the rivals and Team Flare will have appropriate healing items.

Pokémon with types, move pools, or abilities that have been changed as part of the Rebalanced versions are listed in *italics*; see the relevant documents for details.

*Rivals will probably be added at a later date, I just can't be bothered adding so many copies of the same team with slight variations right now. The only thing they have that you may want to be aware of before battling them is a Weakness Policy + Multiscale Dragonite.

*Dugtrio only has two moves here for A.I. abuse purposes. They'll always send out a Pokémon holding a mega stone last, unless it's forced out. Other party Pokémon are sent out if they have a move that is super effective against whatever the opponent has on the field, and are sent out in order otherwise. Because Dugtrio has no damaging moves, it will almost always be sent out immediately before the Houndoom, allowing it to set up Sunny Day and faint itself (unless you KO it first).
